

**Successful HEI performance at the EU PV-Exhibition in Valencia.
Innovative module technology met great interest.**

(16.9.2008) – An overpowering echo proved the PV-Exhibition in Valencia for the HEI Consulting GmbH and her innovative product **hei solar light™**. The fair was a successful first step into the Spanish market. Dietmar Stotter, sales manager for **hei solar light™** and organizer of the exhibition booth in Valencia: „The feedback of the audience was compelling. About 300 interested commercials attended our stand, that was an obvious growth compared to our last fair“. The internationality of the fair was a great advantage for HEI. „In addition to numerous talks with companies from the EU there were concrete inquiries from the United States, India, Australia or Arab region. The PVSEC was the perfect forum for **hei solar light™**.“
